

Rubber Floor Signs

Installation Instructions

Step 1

For best results, clean the designated area thoroughly with an alcohol based cleaner.

Step 2

Remove the quick peel liner from the back of the floor sign.

Step 3

Press the floor signs firmly to the floor to smooth out any air pockets.

Step 4

Tamp the area with at least 150lbs. of weight, using a soft (70 durometer) roller.

Features:

Smooth high gloss top coating that self cleans

Proprietary heavy duty rubber material

Completely customizable high-resolution printing.

Woven reinforcement increases durability and makes removal fast and easy.
