

Superior Mark™ Pre-Cut Floor Kits

Encourage OSHA Compliance

Electrical panel floor marking kits help facilities comply with OSHA regulation 1910.303 which requires the area around electrical panels to be kept clear for 36 inches.

Eye Wash Station floor marking kits clearly marks the station area, and keeps it unobstructed so that people can access it quickly in the event of an emergency.

The Fire Extinguisher Floor Marking Kit will help keep fire extinguishers readily accessible without chance of injury to comply with OSHA Regulation 1910.157(c)(1).

Superior Mark™ pre-cut floor kits include pieces of printed floor marking tape to clearly mark various items in your warehouse.

With puzzle-cut corners, you can easily peel and stick the pre-cut pieces of the kit to create an eye-catching message in minutes.

We also have completely customizable options available. Border kits are available in both 2 inch and 4 inch widths.
