

# Wet Reflective Pavement Tape

## Product Data Sheet

### Features

**Hi-Index Glass Beads:** To provide maximum retro-reflectivity, Wet Reflective Pavement Tape uses exclusive 1.9 hi-index glass beads. Anything less decreases retro-reflectivity and sacrifices safety. No other pavement tape matches the brilliance of [Wet Reflective Pavement Tape](#).

**Aluminum Base:** Wet Reflective Pavement Tape is built upon a rugged and conformable aluminum base that molds to any road surface.

**Superior Adhesive:** Wet Reflective Pavement Tape's exceptional adhesive provides simple unwinding paired with superior holding power.

**Cost:** For a fraction more than temporary paint, and significantly less than removable tape, Wet Reflective pavement Tape provides greater retro-reflectivity and eliminates replacement costs.

### White

4 in. x 50 yd. **SKU: FT-1009**

6 in. x 100 yd. **SKU: FT-1010**

6 in. x 50 yd. **SKU: FT-1021**

### Yellow

4 in. x 50 yd. **SKU: FT-1011**

6 in. x 100 yd. **SKU: FT-1012**

6 in. x 50 yd. **SKU: FT-1017**

### Benefits

**Super Reflectivity:** Wet Reflective Pavement Tape safely leads drivers with more than three times the retro-reflectivity of temporary paint and a greater target value than raised pavement marking systems.

**Preview Time:** Visibility of more than twice that of temporary paint increases driver reaction and response time in unpredictable construction zones.

**Conforms to Surface:** Wet Reflective Pavement Tape readily conforms to an infinite variety of pavement surfaces. Whether your surface is concrete, asphalt, or chip seal, Wet Reflective Pavement Tape molds to your needs.

**Stays Put:** Superior adhesive eliminates stray tape, minimizing replacement costs and limiting liability.

**Affordable:** A fraction more than temporary paint and substantially less than other reflective tapes, Wet Reflective Pavement Tape combines retro-reflectivity, durability, and economy to provide the lowest cost to benefit ratio available.
