

# CONTOURED ANTI-SLIP TAPE

Created for a long lasting and durable performance with enhanced night-time visibility with use of a patented retro-reflective system. Guaranteed to be brighter and more secure utilizing an effective ridged pattern and hybrid ceramic microspheres that will perform better than all others.

- Quick and simple to install
- Extremely durable and long lasting
- Removable, temporarily masks pavement roadway delineation
- Primary uses include construction zones, stairs, doorways, and areas with high foot traffic

## Composition

Developed with layers of anti-slip particles bonded together on a surface patterned with formulated polymer resins, resting on top of a integrated reinforced system. Ensuring durability each roll is equipped with a pressure sensitive adhesive made specifically to create a firm adherence to prepared surfaces and previous pavement makings.

## Application

For proper application, select the desired area of installation and clean completely removing all caked up or loose dirt, gravel, oily residues, and any other substance present. After cleaning make sure the area is dry then apply desired length of tape. Following this application process will ensure durable adhesion.

## Skid Resistance

The surface provides excellent skid resistance. Contoured Anti-Slip Tape exhibits an initial minimum skid resistance value of 45 BPN

## Sizes Available

4 in. X 30 ft., 6 in. X 30 ft., 8 in. X 30 ft.

*Contoured Anti-Slip Tape has raised edges to increase traction when wet and decreases the chances of slipping. The tape is available in black, yellow, and white.*

*The Countoured Anti-Slip Tape can be used both on indoor and outdoor surfaces.*
